The Answer Is...

Both Were Made by AI.

In less than 30 seconds.
For free.

Yes, we all use AI nowadays...

**But in 2026, they've gotten so good
that hiring someone REAL is
starting to become just an option...**

JUST AN OPTION

**Let that sink in
for a second.**

Now let me ask you

**something
uncomfortable....**

If anyone can create designs like this in seconds...

What happens to YOUR Etsy shop in 2026?

The numbers I'm about to show you aren't random...

These are from YOUR OWN ANSWERS

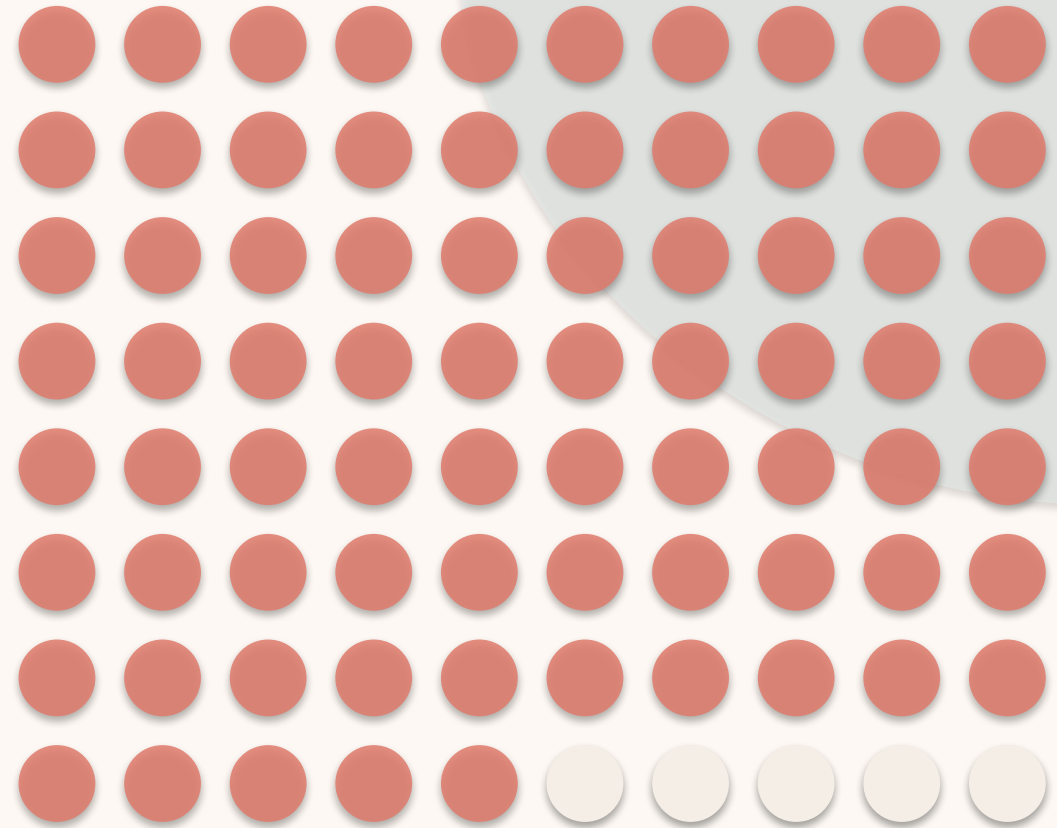

after I asked 160+ of you last week

**160+ SELLERS
SURVEYED**

75+

sellers report their shops
tanked in the last 2 months

If there are 4 people on your row in this chat,
3 of them are feeling this...

ZERO

58+

sellers said their #1 problem:
"No views anymore"

"Not fewer views. Zero.

They're not lazy. They're paralyzed because the rules changed.

**Does anyone else
feel that way?**

Type "YES" in chat

I'm curious how many of you are seeing the same problems

So the real question isn't:

~~"X How do I make more listings? X"~~

**Is Etsy even worth
pursuing in 2026?**

**I'm going to answer that
question tonight.**

And the answer?

**It might honestly
surprise you.**

Because what nobody is talking about is this:

The AI flood actually

CREATES an opportunity

— for a very specific type of seller...

BUT

Only if you understand what's really happening...
