

1 STEP ONE

Persona

Tell AI who it should *become* — an expert role that shapes how it thinks and responds.

EXAMPLE

"You are a conversion copywriter with 15 years of experience writing high-ticket sales pages..."

2 STEP TWO

Context

Give AI the backstory — the situation, the audience, the relevant details it needs to work with.

EXAMPLE

"I'm creating a lead magnet for busy moms who want to start an online business while managing household duties..."

3

STEP THREE

Goal

State exactly what you want AI to create — be specific about the deliverable and its purpose.

EXAMPLE

"Create a 10-page PDF checklist that helps readers validate their product idea before building..."

“

The quality of your output
is determined by the quality of your input.

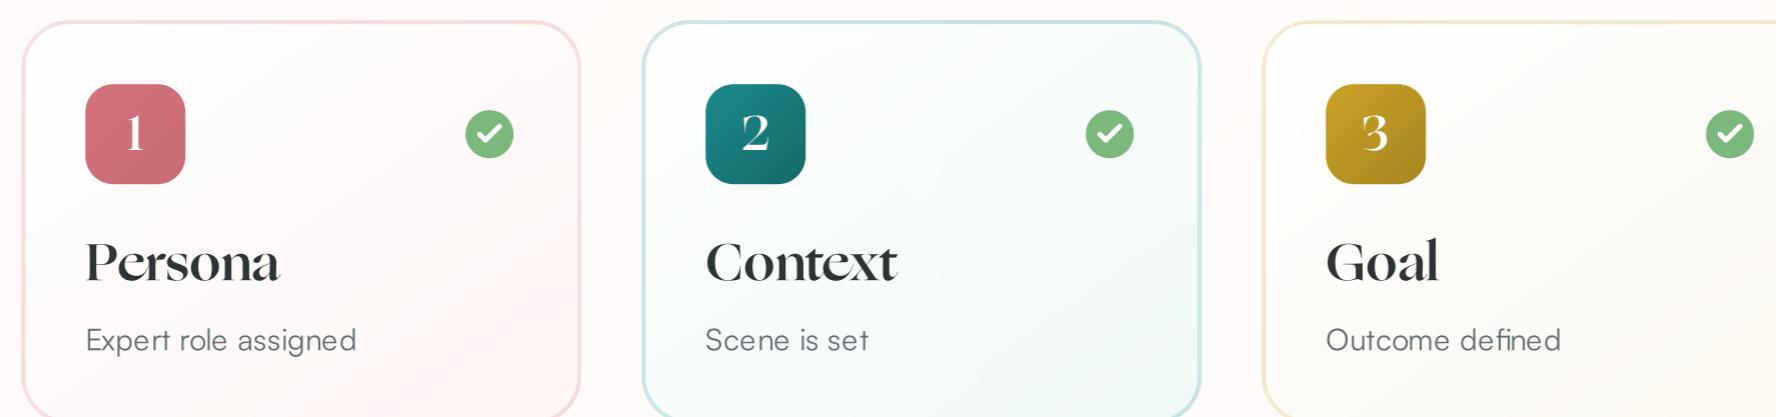

WRITE THIS DOWN #4

— Garbage in, garbage out — Gold in, gold out —
